

## About John Tursi (1917 - 2016)

In 1934, a skinny teenager from Brooklyn, NY stepped down onto the platform at the Depot in Anacortes before boarding a truck to the shores of Deception Pass, where a new bridge was being built to cross a breathtaking expanse of churning water. Although he had never dreamed such a place existed, John Tursi knew that he had found home.

John came to Fidalgo Island under a depression-era program as a member of the Civilian Conservation Corps (CCC). He and the crew helped build much of the Deception Pass State Park infrastructure that still exists today. After the CCC, John settled in Anacortes and married Doris Anderson. John worked for several canneries on Fidalgo Island and then became a supervisor at Shell Puget Sound Refinery, where he worked for over 20 years before retirement.

Community was a very important part of John and Doris' lives and they made generous contributions to help the people, animals and nature of Fidalgo Island. Over the years, John ensured that the places he fell in love with would be here for future generations. Not only did he help build the infrastructure at Deception Pass State Park, but years later he and Doris donated a conservation easement on Fidalgo Bay to Skagit Land Trust. In addition, John was the largest donor in the campaign to forever protect the Anacortes Community Forest Lands.
